

Natural Resources and Civilizations

Technology

Technology

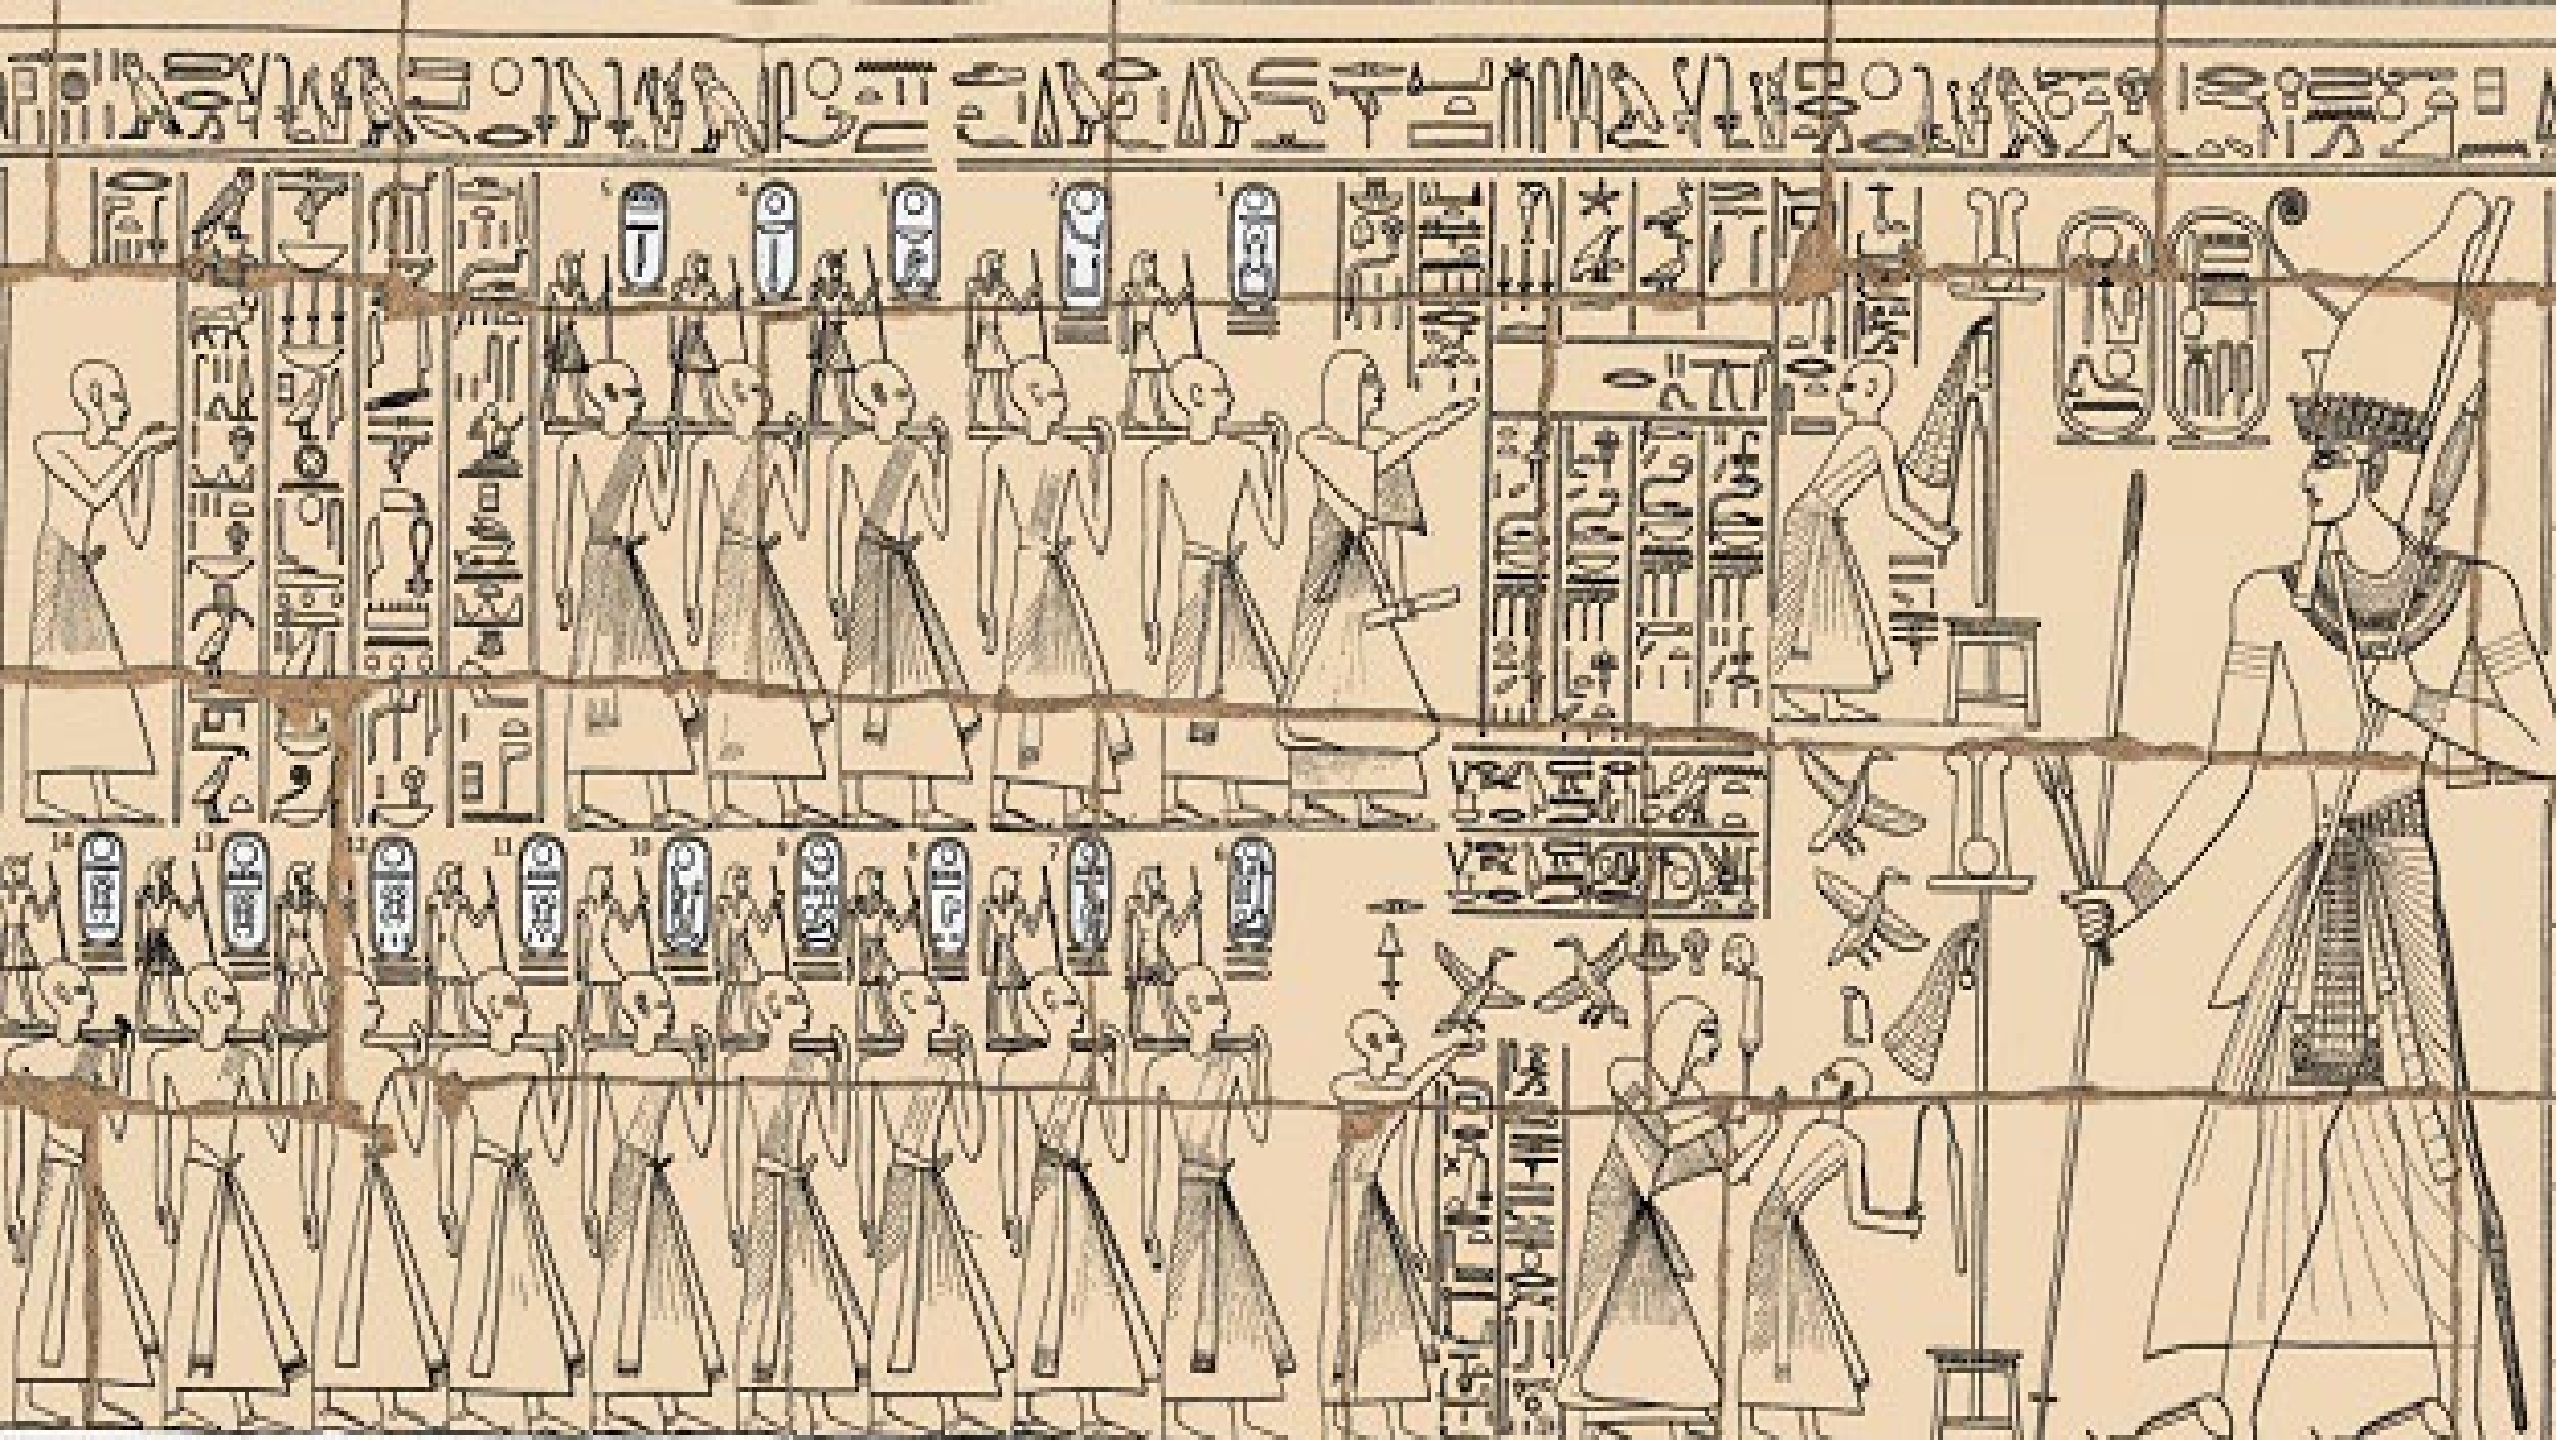

- What is it?
- What role did it play in past Civilizations?
- What role does it play in today's society?
- How are natural resources and technology related?
- How does technology strengthen or weaken a civilization?
- What is the future of technology in our civilization?

Technology

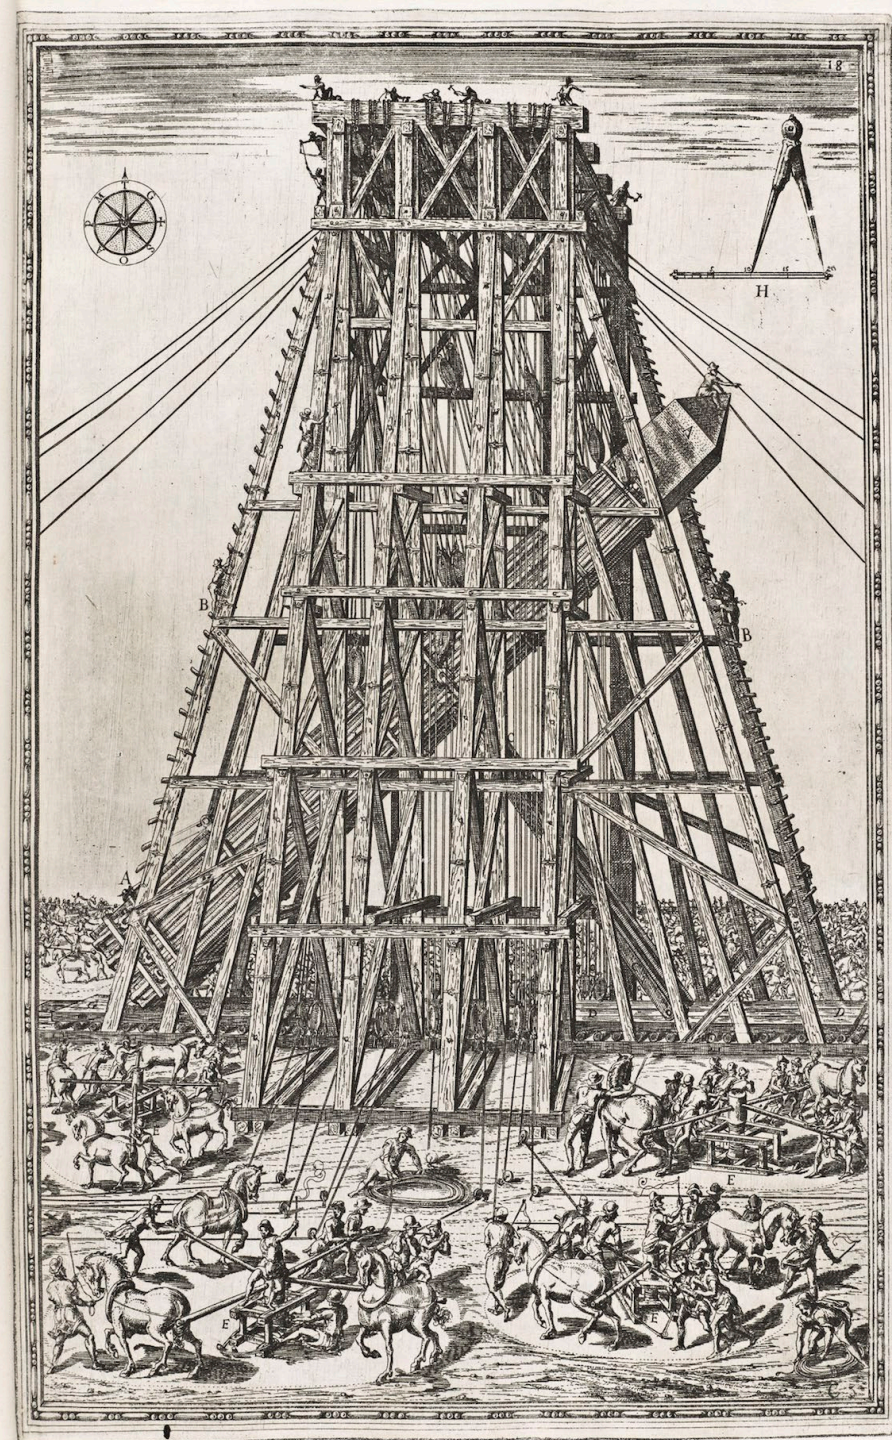

Noun –

- the application of this knowledge for practical ends.
- the sum of the ways in which social groups provide themselves with the material objects of their civilization.
- the branch of knowledge that deals with the creation and use of technical means and their interrelation with life, society, and the environment, drawing upon such subjects as industrial arts, engineering, applied science, and pure science.
