Comments for speaker A

good intro. not heavy reliance on notes, could have more eye contact, nice pictures, very cool design project, good connection between sustainability, and career plan,

Comments for speaker B

soft voice, if he's interested in restoring pelletizer habits he should look into Conservation Corp. Iowa + Minnesota there's a group that goes around Iowa collecting data on monarchs, seem a little nervous, good rhythm of speaking (no pauses), connection to past speakers!

Speaker E: nice intro, strong voice, could use more eye contact, very cool that he's in a band, connection to past speaker!, good independence from notes, interesting combination of environmental + music

Comments for speaker C

good introduction, cute slides, very active, good eye contact, good flow of information, connection to past speaker!, seemed a bit short

Comments for speaker D

strong voice, good introduction, very cool background, connection to speakers!, short presentation, seems passionate,
