

Paul Kimball

Iowa Geology For Teachers Workshop
Project Development

1. Project Summary:

- a. I will construct a photo-journal of the activities and experiences actualized during the Geology of Iowa for teachers seminar.
- b. The photo-journal will establish a lecture based scaffolding for introduction of student activities and related geomorphic and limnetic principles to be used in environmental science lab.
- c. The images selected will be transferred to a CD-ROM image bank Power Point© presentation disc by means of a scanning device and used to initiate correlative environmental science lab science activities.
- d. Effectiveness of the project will be determined by references to planned environmental curricula and specific terminology delineated on those assessment sheets
- e. Photographic journal-
